NOTIFICATION OF TRANSMITTAL OF INTERNATIONAL PRELIMINARY **EXAMINATION REPORT**

(PCT Rule 71.1)

IMPORTANT NOTIFICATION

Date of mailing

(day/month/year)

21 SEPTEMBER 2004 (21.09.2004)

Applicant's or agent's file reference FGPL03-002

PCT/KR2003/001119

International application No.

International filing date (day/month/year)

Priority date (day/months/year) 08 JUNE 2002 (08.06.2002)

09 JUNE 2003 (09.06.2003)

Applicant

LG INNOTEK CO.,LTD et al

- The applicant is hereby notified that International Preliminary Examining Authority transmits here with the international preliminary examination report and its annexes, if any, established on the international application.
- A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report(but not of any annexes) and will transmit such translation to those Offices.

REMINDER

· 在10年1年1月1日日日日日日日

The applicant must enter the national phase before each elected office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details in the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

*	in th	scement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to sopinion as "originally filed." and are not annexed to this report since they do not contain amendments (Rules 70.16 0.17).			
*	* Any	eplacement sheet containing such amendments must be referred to under item I and annexed to this report.			

INTERNATIONAL PRELIMINARY EXAMINATION

International aplication No. PCT/KR2003/001119

V. Rea	soned statement under Article 35(2)	with regard to novelty	, inventive step or industrial a	pplicability;
	itions and explanations supporting s		-	

1.	Statement			
	Novelty (N)	Claims	1-10	YES
		Claims		
	Inventive step (IS)	Claims	1-10	YES
		Claims		МО
	Industrial applicability (IA)	Claims	1-10	YES
		Claims		No

2. Citations and explanations (Rule 70.7)

The following documents from the International Search Report have been considered for the purpose of this written opinion:

D1: US 4216401 A
D2: US 4454440 A
D3: US 5051645 A
D4: WO 99/21001 A1

1. Subject Matter

The invention claimed in claims 1-10 relates to an SAW sensor device for sensing the pressure using a slit acoustic wave comprising: a piezoelectric medium having a thin film at its upper portion, a medium at its lower portion, and a slit to sense the outside pressure applied to the sensor; an input IDT formed at an outer portion of said slit, for transducing an electric input signal into the slit acoustic wave; and an output IDT formed at an outer portion opposite to said input IDT, for receiving the propagated slit acoustic wave and transducing the wave into an electric signal.

2. Prior Art

D1 discloses an improved SAW pressure sensor that comprises a dual substrate including a SAW substrate and a base substrate. The SAW substrate has parallel major surfaces spaced relative to each other at a first dimension equal to a desired diaphragm thickness, a first major surface including electro-acoustic transducers disposed in an active signal region thereon to provide one or more SAW delay lines, and the base substrate has an aperture extending therethrough from a mating surface to a base surface thereon.

(Continued on Supplemental Sheet.)

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International aplication No.

PCT/KR2003/001119

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of:

Box V.

D2 discloses a surface acoustic wave (SAW) pressure sensor that is mechanically supported within a vacuum sealing structure by a cylindrical metal sleeve which isolates the SAW sensor substrate from induced thermal strain resulting from the temperature cycling of the structure.

D3 relates to a surface-acoustic-wave (SAW) H2O phase-change sensor capable of distinguishing air, water, dew, frost and ice.

D4 relates to a surface acoustic wave sensor.

3. Novelty and Inventive Step

The claimed invention is characterized in that a slit is provided at a piezoelectric medium for sensing the pressure applied from the outside of a sensor, and that the IDT detects the change in the nature of the acoustic wave within the slit according to the external pressure. None of the cited documents D1-D4 teach or fairly suggest the technology for measuring the change in the nature of the acoustic wave within a slit according to the external pressure and detecting the external pressure by a slit provided at a piezoelectric medium.

Therefore, the subject matter of claims 1-10 is considered to meet the requirements of PCT Article 33(2) and 33(3).

4. Industrial Applicability

The subject matter of claims 1-10 is considered to meet the requirement of PCT Article 33(4).
